DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

The property is underlain by Pennsylvanian to Triassic (?) Milford (?) Group pelitic schist and calc-silicate metasedimentary rocks. Early trenching exposed a quartz vein 8 to 10' wide. A sample of mineralization from the trench assayed 0.06 oz/t Au, 22.7 oz/t Ag, 2.1% Pb, 4.2% Zn.

Associated minerals or products - Gold, zinc, lead.
Minéraux ou produits associés

HISTORY OF EXPLORATION AND DEVELOPMENT
HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

The property is located between elevations of 6,500' and 7,500' on the summits of Grey Wolf Mountain and Golden Hope Peak, 8 miles east-southeast of the Lower Arrow Lake community of Burton.

The Silver Queen Mining Company, Limited Liability was organized in 1897 to acquire 8 claims in the Grey Wolf, Red Fox, Black Fox and Black Bear groups; the claims were Crown-granted (Lots 2204-2209, 2414, 2582) to the company in 1899. Development work included open cuts, a 30' shaft and about 350' of drifts and crosscuts in one adit on the south side of the mountain at about 6,500' elevation.

The Golden Hope claim (Lot 1797), located about one-half mile west of the Grey Wolf, was Crown-granted to M.D. Shea in 1901.

The Silver Queen property was owned in 1930's and early 1940's by H. Stones and J. Gayford, of Burton; some prospecting was reported.

The discovery in 1980 of high grade gold values on the nearby Tillicum Mountain property, subsequently acquired by the Esperanza Explorations Ltd and Welcome North Mines Ltd joint venture, led to additional claim staking (Til 1-4) to include the Silver Queen ground. Welcome North terminated the joint venture in March 1982. La Teko Resources Ltd in June 1982 optioned a 50.4% interest in Esperanza Explorations Ltd. A geochemical survey on the Silver Queen in 1983 indicated a strong silver anomaly over a 150' x 3,000' area.
