Associated minerals of value

The Gypsum Industry of Can. Rep. 714. 1930. p. 63

B. C. Dept. of Mines 1922: p. 153 Deposits are located about 600 ft. above level of river. Two outerops visible almost 2000 ft. apart.

Sample from prospect tunnel analysed:

Insol. : 0.04% CaO : 32.70% So3 : 46.72% H2O : 20.60%

Little work has been done to determine extent of the deposits.
